

Iftakhar Ahmed

Software Engineer — Full Stack Developer — DevOps Engineer
Dubai, United Arab Emirates
+971 54 504 9398 — iftekharaahmed2003@gmail.com — [ginpin21.github.io](https://github.com/ginpin21)
3+ Years Experience

Profile Summary

Full Stack Developer with 3+ years of experience designing, building, and deploying scalable web applications and cloud-native systems. Strong expertise in Next.js, React, Node.js, Express, FastAPI, and PostgreSQL, with hands-on DevOps experience across AWS, GCP, and Azure. Experienced in CI/CD, containerized deployments, real-time systems, and infrastructure automation. Passionate about building production-ready, high-performance systems end-to-end.

Work Experience

Full Stack Developer (Hybrid) July 2025 – Present
Koninfotech – Dubai Silicon Oasis, UAE

- Architect and maintain full-stack systems using Next.js (studio & admin dashboard), Express.js (internal back-end), and FastAPI (public API).
- Built and deployed a scalable public API on AWS EKS, improving client integration efficiency.
- Developed and published public SDKs in Node.js and Python, reducing onboarding time for partners.
- Engineered a real-time AI-powered agentic avatar with accurate lip-sync using WebRTC and MediaSoup SFU.
- Designed and implemented CI/CD pipelines using GitHub Actions with Slack notifications.
- Managed and optimized cloud infrastructure across AWS and GCP (EC2, EKS, S3, Lambda, Cloud SQL).
- Refactored backend services, improving API performance and reliability.
- Implemented proactive monitoring and infrastructure automation to reduce downtime.

Junior Web Developer (Remote) April 2023 – July 2025
Viewit – Dubai, UAE

- Maintained and optimized Express.js backend and Nuxt.js frontend for a production platform.
- Designed scalable backend infrastructure using Azure services and Fastify.
- Built Azure Serverless Functions for Email and WhatsApp automation.
- Integrated GA4 and GTM for analytics tracking.
- Improved SEO by integrating a headless WordPress blog system.
- Supported React Native mobile application maintenance and updates.

Web & Application Engineer (Remote) Nov 2023 – June 2024
The Corporate Lounge – Florida, USA

- Debugged and optimized React.js web and mobile applications.
- Worked with AWS services including Lambda, RDS, Cognito, AppSync, and Amplify.
- Supported Play Store and App Store deployments.

Personal Projects

- **Plugin Electronics**
Full-stack e-commerce platform built with Next.js 14, Vue 3, Express, and PostgreSQL. Developed customer storefront, admin CMS, and checkout system.
- **Swift LMS**
Role-based LMS platform with real-time chat and assignment management using Next.js and Supabase.
- **WINC Library Management System**
Library system with book issuance management, search functionality, and member registration.

Technical Skills

- **Frontend:** Next.js, React.js, Vue.js, Nuxt.js, Tailwind CSS
- **Backend:** Node.js, Express.js, Fastify, FastAPI
- **Languages:** TypeScript, JavaScript, Python, C#, Java
- **Databases:** PostgreSQL, MySQL, MSSQL, MongoDB, Supabase
- **Cloud & DevOps:** AWS, GCP, Azure, Docker, Nginx, GitHub Actions (CI/CD)
- **Tools:** Git, GitHub, Jira, Figma

Education

- **B.Eng. (HONS) Software Engineering – First Class Honors**, University of Bolton, RAK Academic Center, **2021–2024**
- **Higher Secondary Education – CBSE Grade 12 Science - 96%**, International Indian School, Ajman, **2020–2021**

Languages

- English (Professional)
- Urdu (Professional)
- Bengali (Native)
- Hindi (Intermediate)

License

- Valid UAE Driver's License
